

Dear Hiring Team,

I am writing to express my strong interest in the IP/MPLS Network Support Engineer role at Nokia. As a Software Engineering Co-op student at McGill University with hands-on experience in Linux environments (through raspberry pi), network automation, and data systems, I am excited about the opportunity to contribute to Nokia's world-class IP routing and networking operations.

Through building and maintaining my own home server (NAS) network infrastructure, I have developed a practical understanding of IP networking principles, Linux system administration, and network troubleshooting. This hands-on environment has allowed me to apply routing protocols (OSPF, IS-IS, BGP), configure network storage, and automate administrative tasks using Bash scripting and Python programming. Complementing this, my research work at the National Institute for Scientific Research (INRS) and the Ministry of Transportation involved managing data pipelines, writing Python algorithms, and solving complex technical problems under operational constraints.

While I do not currently hold a certification from the Nokia Service Routing Certification (SRC) Program, I am highly motivated to pursue and obtain it as part of my professional development. My strong foundation in computer engineering concepts, paired with my rapid learning curve, will allow me to quickly master Nokia's Service Router Operating System (SR OS) and service architecture.

Furthermore, my leadership and customer-facing experiences ranging from managing restaurant operations to founding academic committees have sharpened my communication, teamwork, and technical troubleshooting skills under pressure. I thrive when diagnosing complex system behaviors and delivering clear, actionable technical support.

Nokia's leadership in mission-critical IP networks makes this role an ideal fit for my technical interests and career goals. I welcome the opportunity to discuss how my practical network experience, automation skills, and drive can add value to your engineering team.

Thank you for your time and consideration.

Sincerely,

Renji Jenkins
