

Dear Hiring Team,

I am writing to express my strong enthusiasm for the Technical Project Manager Co-op/Intern position for the Winter 2027 term in Ottawa. As a Software Engineering Co-op student at McGill University holding the Google Project Management Certificate, I am eager to combine my technical software engineering background with formal project management principles to support Nokia's R&D deliverable milestones.

Throughout my academic and leadership journey, I have cultivated a strong understanding of software development lifecycle (SDLC) methodologies, Agile practices, and project coordination. As the Founder and Coordinator of the Cégep Garneau Academic Competition Committee and former VP of Finance of a politics club, I managed project timelines, resource allocation, and budget tracking for multidisciplinary teams. I regularly leverage project management tools such as Trello to organize milestones and track deliverables, ensuring high attention to detail and on-time execution.

In addition to my management training, I bring a versatile technical skill set that bridges engineering and stakeholder communication. I am proficient in Python, Java, JavaScript, and Power BI, allowing me to understand complex technical requirements, analyze program data, and build intuitive status dashboards for release planning. Furthermore, I regularly use Adobe Premiere Pro to produce video presentations that clearly communicate project outcomes and technical concepts to broader audiences.

Having completed engineering work terms in government and research settings at the Ministry of Transportation and INRS, I thrive in fast-paced environments where proactive problem-solving, structured organization, and clear cross-functional communication are critical. I am excited about the opportunity to support release planning, track QA milestones, and contribute to continuous process improvement initiatives across Nokia's multi-site R&D organization.

Thank you for your time and consideration. I welcome the opportunity to discuss how my project management training, technical background, and leadership experience align with your team's goals.

Sincerely,

Renji Jenkins
